

Where are my iPhoto pictures?

1. Locate your iPhoto library. It is usually found in the pictures folder.
2. Hold the control key down and single click on the album icon.
3. In the window that opens select "show package contents"
4. The package will open.
5. Find the originals folder and open it.
6. Within the folder you will find folders labeled by year. Within these folders you will find folders organized by month. Within these folders are your photos.
7. If you are interested in photos you modified, follow step 6 but use the modified folder.

CAUTION!! Do not remove a photo from its folder. If you would like to store a copy of the photo in another place, duplicate it and move the duplicate.
