

SBC – setting up options

Using Safari go to: www.yahoo.com

Then click on “My Mail” on the left side of the screen:

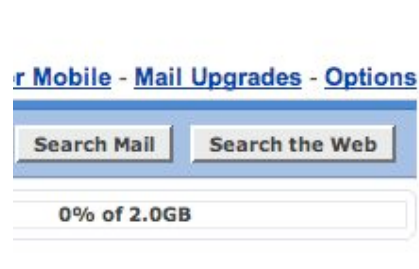

That will take you to this page:

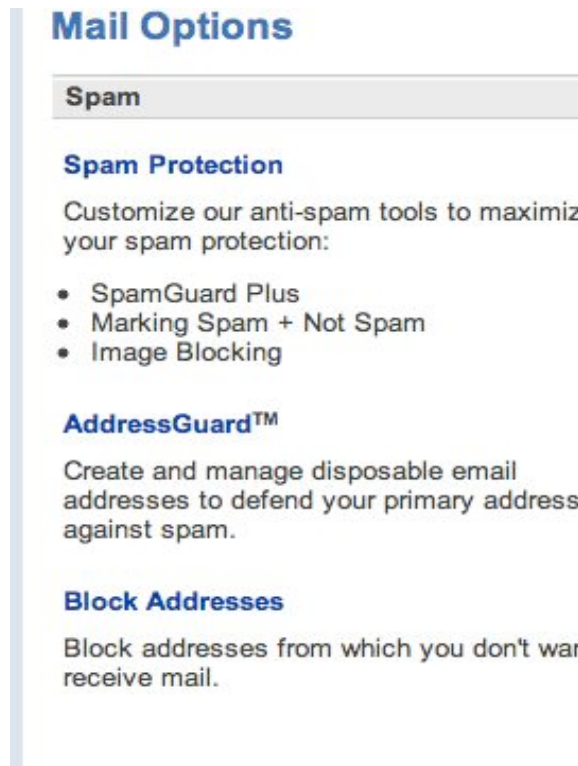

Put your complete email address in the ID (abc@sbcglobal.net) and then your password for your email account.

This will then take you to your web mail with SBC (Yahoo). In the right hand corner of your email you will see a line titled “Options” – click on this:

This will then take you:

Mail Options

Spam

Spam Protection

Customize our anti-spam tools to maximize your spam protection:

- SpamGuard Plus
- Marking Spam + Not Spam
- Image Blocking

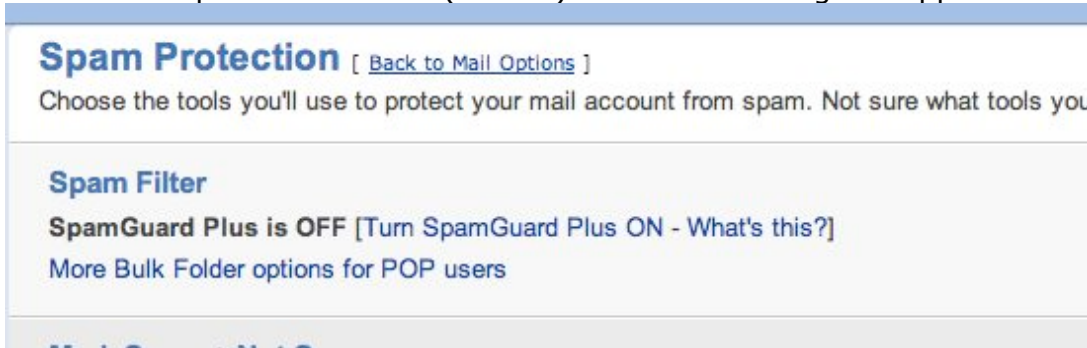

AddressGuard™

Create and manage disposable email addresses to defend your primary address against spam.

Block Addresses

Block addresses from which you don't want to receive mail.

Click on the line "Spam Protection" (in blue) and the following will appear:

Spam Protection [[Back to Mail Options](#)]

Choose the tools you'll use to protect your mail account from spam. Not sure what tools you

Spam Filter

SpamGuard Plus is OFF [Turn SpamGuard Plus ON - What's this?]

[More Bulk Folder options for POP users](#)

Turn off the Spam Filter

You will now get all your mail in your 'Mail' program or on the Web. It is up to you to decide if it is Junk or good mail.
